

## Electrical Controls Engineer

### **Essential Job Functions**

DJS is a company specializing in engineered packaging and automation systems. We are looking for an engineer with experience working with programming and system configuration utilizing Allen Bradley Controls.

### **Required Skills:**

- Experience with writing programs for motion control, multiple servo axis, freq. drives and sensors.
- Capable of building programs from start to finish.
- Work with suppliers to introduce and implement latest technologies to continually improve our systems and offerings to our customers.
  
- 3D Inventor and/or Solid Works design experience.
- 2D AutoCAD Electrical experience.
- BSME or BSEE are preferred.

### **Basic Qualifications**

- Experience working with PLC's, HMI's, Servo & other motor drives (A-B Rockwell & other Software)
- Experience working with pneumatic components
- Willingness to travel to customer sites. Not a significant amount.
